

PROTECT YOUR INVESTMENT BUY GENUINE PARTS

You work too hard to let inferior parts get in the way of your business. When your Freightliner needs replacement parts, don't compromise on quality. Insist on Genuine Freightliner Parts – made exclusively for your Freightliner with the same built-in quality and value as the original equipment. With Genuine Freightliner Parts, you receive:

- Parts that are made specifically for your Freightliner model/application – not “one size fits all”
- The highest quality materials, using our innovative manufacturing processes
- The latest design and engineering enhancements
- Superior fit and finish
- Strict, production-rated durability standards
- Freightliner-backed parts warranty coverage.

TRUST THE EXPERTS

When in need of replacement parts, trust the experts at your authorised Freightliner service outlet. Nowhere else will you find the full range of Genuine Freightliner Parts and the factory-trained technicians to get your truck back on the road.

For more information on Genuine Freightliner Parts and to find authorised Freightliner service outlets and body shops in your area, visit www.freightliner.com.au or call 1300 66 22 30.

CHOOSE GENUINE FREIGHTLINER PARTS

When it comes time to replace parts – trust the best.
Insist on Genuine Freightliner Parts.

**YOU BOUGHT A FREIGHTLINER.
KEEP IT A FREIGHTLINER.**

RUN TOUGH

Let's face the facts. Trucking isn't a hobby – it's your livelihood. And you don't take chances when it comes down to getting the job done. Of course, you already know that – and that's why you made the smart choice to buy a Freightliner in the first place.

Rest assured, your Freightliner truck purchase is one of the best business decisions you could have made. Freightliner trucks run tough and are designed, engineered and manufactured for optimum performance, productivity and revenue.

DRIVABILITY

Every Freightliner truck is expertly crafted to meet the harsh demands of the open road. Our trucks are known for their comfortable ride and handling, ease of manoeuvrability and clear sightlines that inspire driver confidence.

FUEL EFFICIENCY

In today's economic climate, everybody is trying to do more with less. With Freightliner's advanced line-up of efficient Detroit and Cummins engines, you'll be sure to stretch every last kilometre out of your tank.

PAYLOAD CAPACITY

Freightliner trucks provide the confidence of knowing you can take on even the biggest of jobs – and get them done without breaking a sweat.

RELIABILITY AND UPTIME

In this business, time is money. Freightliner trucks are known for staying on the road – and out of the shop.

COST OF OWNERSHIP

Your truck represents a lot more than the price on the window sticker. You also have to consider fuel economy, reliability, repair bills and costly downtime. Freightliner trucks are designed from the ground-up to deliver optimum performance and productivity – making it a wise decision.

INSIST ON THE BEST

DON'T MAKE A BAD SITUATION WORSE

Accidents happen. Whether at fault or not, the end result is the same – downtime. To be successful in this business, you need to minimise downtime and get your rig back on the road fast. So when it's time to call the insurance company, remember one thing – you should insist on Genuine Freightliner Parts. Don't be led to non-authorized body shops that may substitute low-cost, lower quality aftermarket alternatives.

KEEP IT A FREIGHTLINER

DON'T LET A CHEAP FIX COST YOU BIG

Everyone likes to save a little money – unless it's going to cost you big down the road. By insisting on Genuine Freightliner Parts, installed at an authorised Freightliner service outlet, you can rest assured that your Freightliner truck will operate at peak efficiency and productivity.

When making your decision, consider the big picture...

- Genuine Freightliner Parts assist to maintain the resale value of your truck by keeping it a "Genuine Freightliner"
- Your authorised Freightliner dealer has the genuine replacement parts and the factory-trained experts to repair your vehicle correctly – the first time
- Genuine Freightliner Parts get your rig back up and running quickly and conveniently – reducing the costs of downtime.

"PERFECT FIT" VS. "WILL FIT"

THE DIFFERENCE IS CLEAR

Sure, you can find replacement parts that "fit" – a term that is used liberally. But when it comes down to quality, fit and finish and lasting durability – those non-genuine parts simply cannot compete. Genuine Freightliner Parts are a perfect match for your original equipment – and are backed by reliable parts warranty coverage you can trust.

Material Quality – Genuine Freightliner Parts are made of the highest quality materials with specialised coatings/treatments to ensure optimal durability and performance.

Aftermarket manufacturers often substitute lower quality materials to cut costs.

Fit and Finish – Unlike our competitors, Genuine Freightliner Parts are made specifically for each application to maintain your truck's original appearance. Non-genuine competitors often produce "one-size-fits-all" parts that result in an imperfect fit.

OEM Engineering – You bought a Freightliner. Keep it a Freightliner. You simply can't beat the factory designed quality of Genuine Freightliner Parts. Our parts are designed and manufactured by the same people who designed your Freightliner truck.

Factory Manufacturing – Freightliner makes substantial investments in the highest quality moulds and manufacturing equipment. Competitors often use low-cost tooling to minimise their investment – yielding inferior levels of quality in their parts.

Performance and Efficiency – Every Genuine Freightliner Part is designed to provide optimal performance and efficiency – including the latest proprietary updates and revisions that the competition simply cannot match.

NON-GENUINE PARTS' EFFECT ON WARRANTY

Non-genuine replacement parts are NOT covered by the Freightliner warranty. Failures caused or contributed to the use of Non-genuine parts, or associated Freightliner part/system failure caused by the use of these parts, are not covered.
